More on what to expect as the standards emerge and how that will impact local collection databases

I'd like to learn more about how I can query the data, in an SQL-like fashion using BioCAsE.

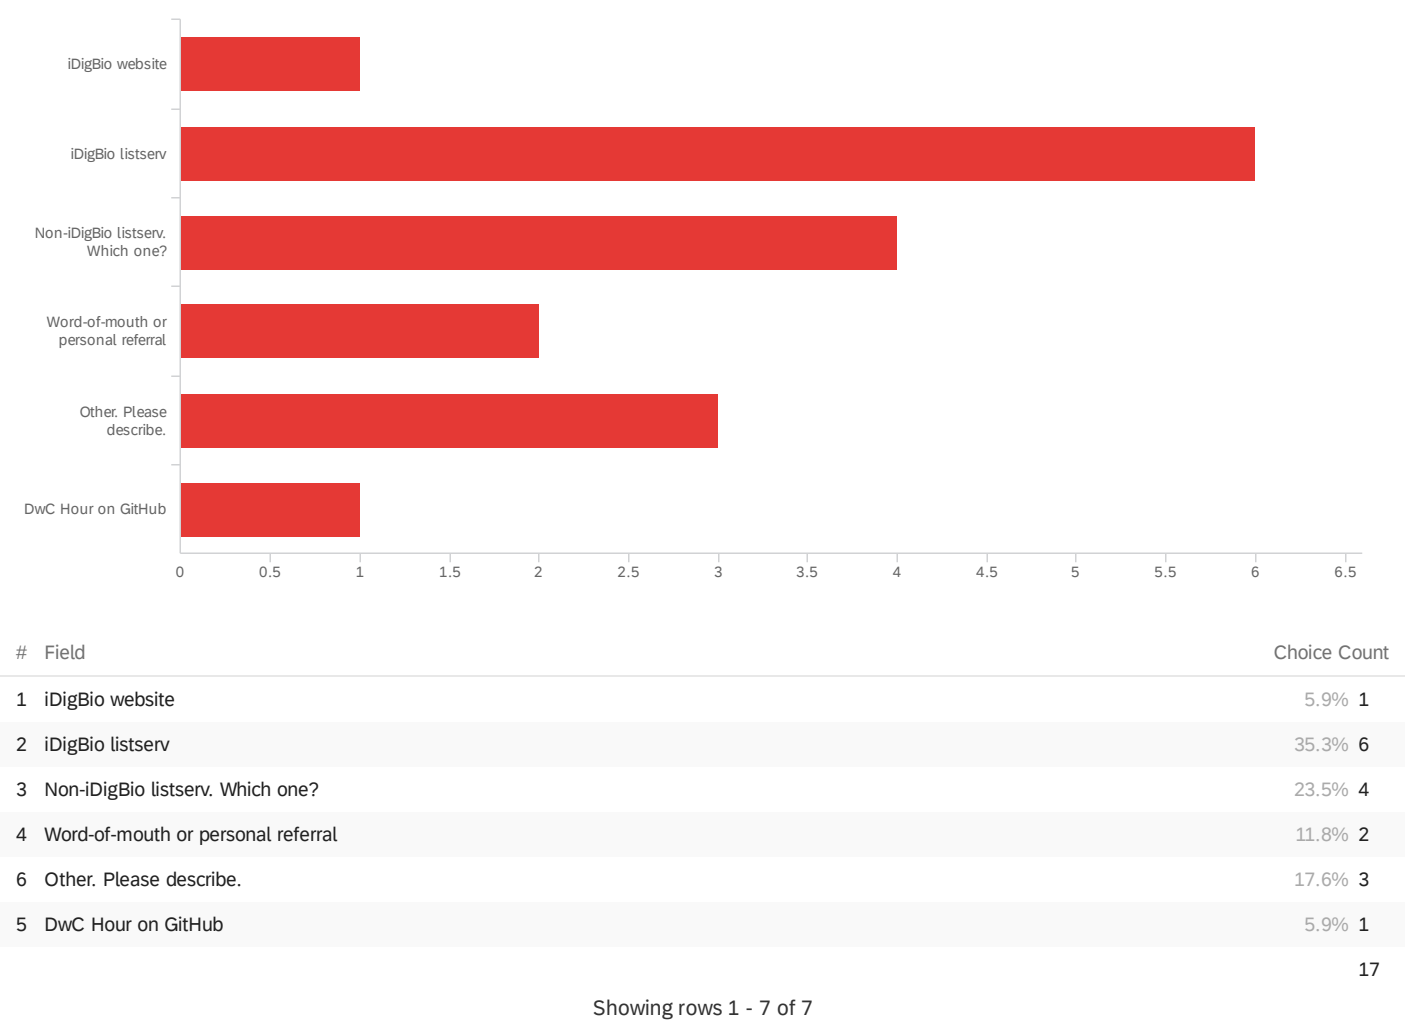

Would love to see ABDC and BioCAsE in action, either live demos or someone like Gary talking about how it's used. I think my institution is a long way from integrating something like this into our workflows but I am excited by the potential

Web security of BioCAsE; approaches to controlling access to certain records (e.g., records with field collection locations of rare plants)

Any other comments, questions, or suggestions for improvement?

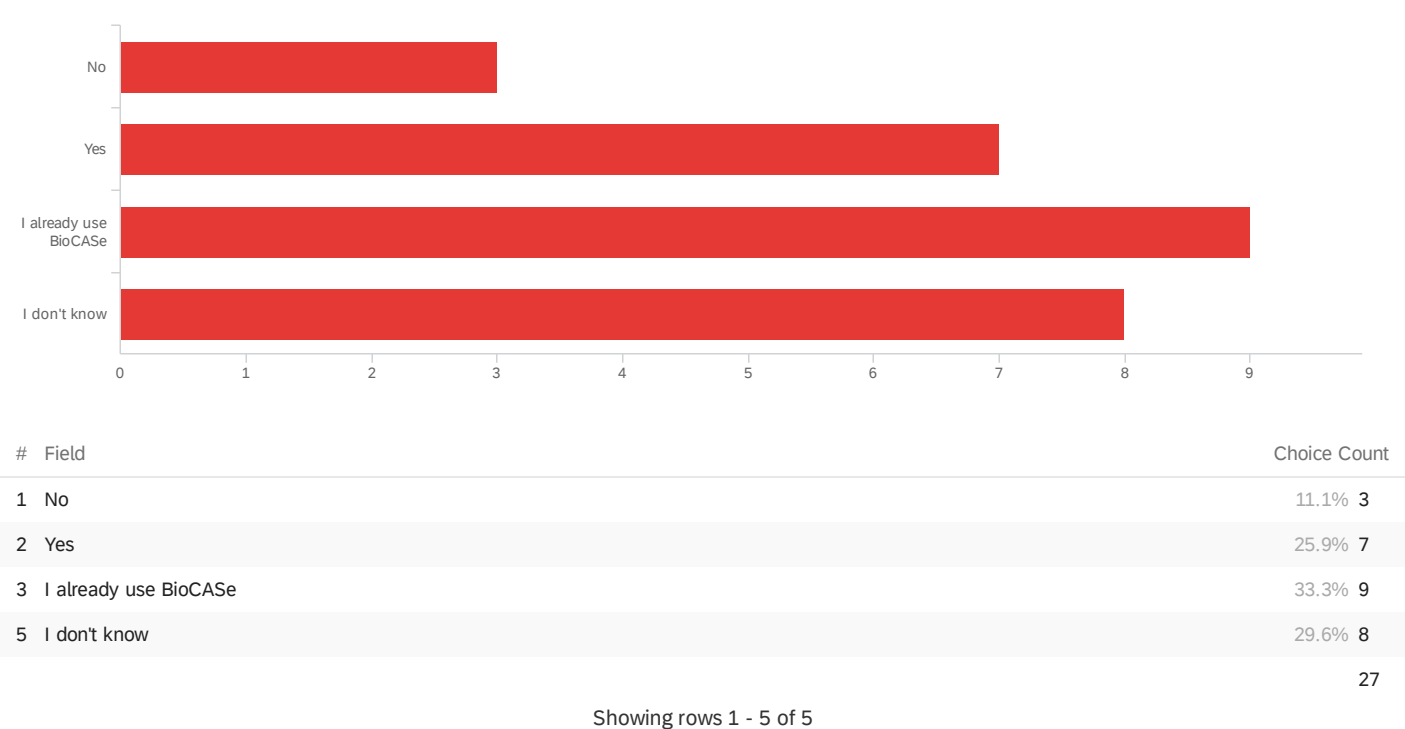

Nope - enjoyed

Ensure notices of future webinars go to DiSSCo mailing lists/channels as well.

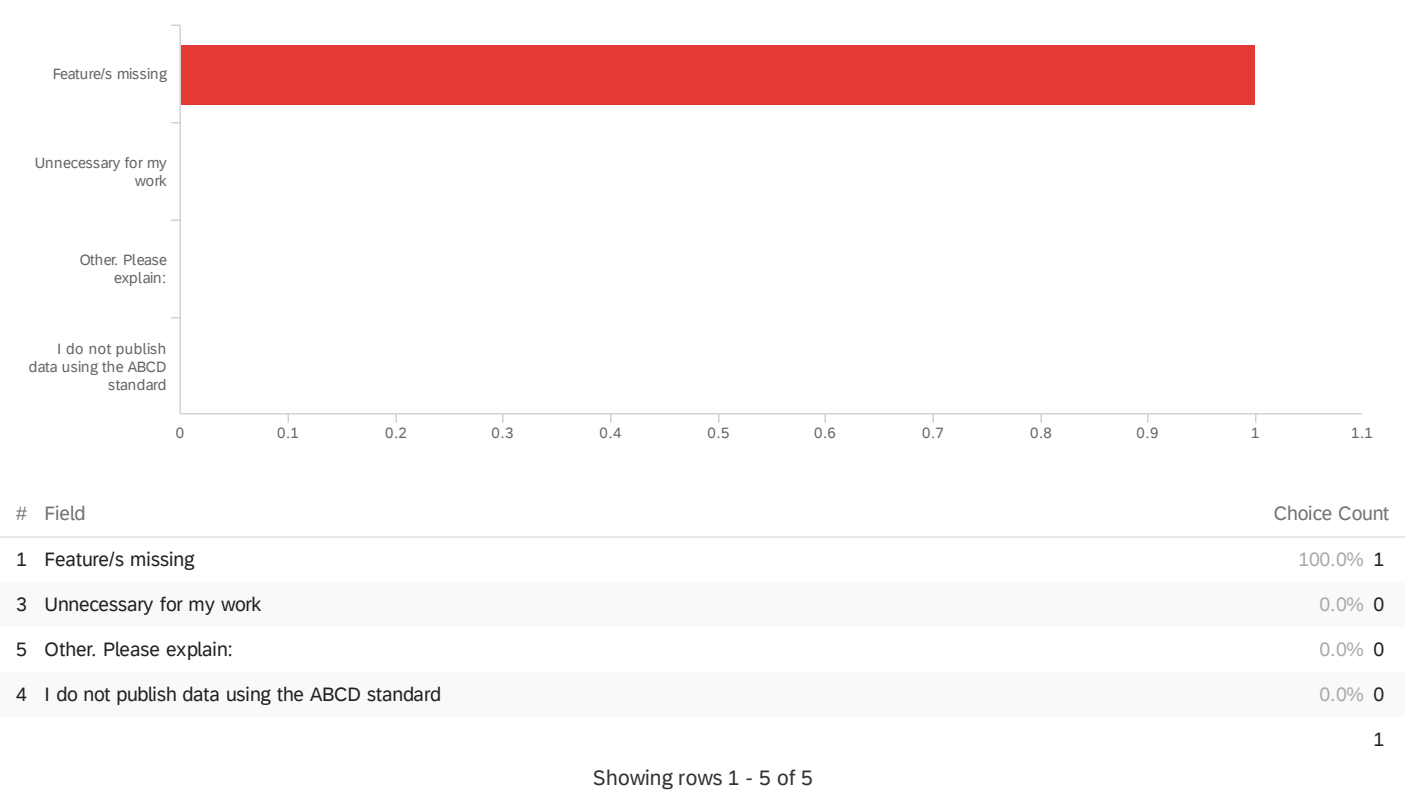

Please keep these going! As someone who is relatively new to data management in a museum context community events like these are so helpful. Many thanks!

Thanks!
